Fax: +7 (4212) 72-87-15

9, Krasnodarskaya Street,
Khabarovsk, Russian Federation, 680009

Dear colleagues!

It is our pleasure and privilege to invite you to join the XVI International Congress «Evidence-based medicine is a foundation of the modern health care». We have common purposes: to improve the quality of medical service, to introduce self regulated model of professional activity, to improve medical education and create conditions for the constant development.

Government's view on future Healthcare in Russian Federation focuses on the replacing standardized medicine by a personalized, predictive, preventive, and participatory (P4) medicine, that detects disease at an earlier stage, when it is easier to treat effectively; reduces drug reactions by more effective early assessment of individual drug responses; provide more close and active partnership between doctor and patient in the treatment period. Such complex approach can lead us to new opportunities for modern medicine. **The P4 method will be the main theme and leading idea of the Congress – «“4P” medical model - preventive, predictive, personalized and participation».**

The Organizing Committee prepared a large program which includes plenary and breakout sessions, Scientific and Practical Conferences, workshops, roundtable conferences, master classes, practical demonstration, symposiums, educational forum, simulation training, Contest of Young Scientist, poster presentations, exhibition of medical and pharmaceutical products, selling exhibition of medical scientific and educational literature.

The main goal of the Congress is to provide a platform to healthcare, medical and pharmaceutical professionals and scientists for discussion and debating important issues, theories and ideas from EBM point.

General information

Events of the Congress will be held in halls of Postgraduate medical institute for the Health service specialists' development that located 9, Krasnodarskaya Street, Khabarovsk, Russian Federation, 680009.
